

Counting 70 years of experience, Iskratel is the leading European provider of infocommunications solutions, with its own R&D and manufacturing centres, 900 employees and local presence in over 30 countries. Iskratel delivers integrated telecommunications solutions for telco, transportation, public safety, and energy industries.

Broadband Access and Aggregation References

Iskratel's in-depth expertise in telecommunications, field-proven solutions and professional services and support, guarantee the smooth integration of Iskratel's broadband access and aggregation solutions with any environment or network.

Iskratel is proud of successful deployments of broadband solutions in numerous countries worldwide. Using the brands SI3000 and Inbox, Iskratel broadband products are used on all continents by incumbent, alternative, cable and convergent operators. Iskratel solutions empower their businesses with new sources of revenue and reduced operating costs.

Why Iskratel broadband solutions?

Iskratel's broadband solutions fit all deployment sizes, from entry-level to large-scale. They support all service-delivery models, and guarantee supreme user experience of even the most demanding consumers.

But why believe words – you are invited to deploy Iskratel broadband in your own environment, and join the list of our satisfied customers.

“Iskratek delivered, deployed and successfully commissioned FTTH GPON active equipment, including OLT, ONT, EDFA and relevant management system for our company. The products are professionally supported and maintained by Iskratek employees.

Salvador Garcia Vargas
Chief Executive Officer
OnlyCable Comunicaciones

“Iskratek's FTTC solution empowered us to reuse our copper network in rural and suburban areas, and bring high-speed broadband to users at a reasonable price, boosting Telekom Slovenije one step closer to the goals of Digital Agenda Europe 2020.

Matjaž Pogačnik
Head of Project
Digital Agenda Europe in Slovenia
Telekom Slovenije

“Rostelecom and Iskratek cooperate fruitfully for over 30 years. In broadband projects, Iskratek has proven to be a trustworthy partner, duly implementing its contractual obligations on time. Reliable and simple to operate, Iskratek's equipment guarantees a high-quality delivery of broadband services.

A. M. Tseitlin
Senior Vice-President
Technical Infrastructure
Rostelecom

“Iskratek exhibited a high level of professionalism and competency in meeting the objectives. We found Iskratek's equipment of high quality and reliable in operation. Throughout our long-lasting partnership, Iskratek demonstrated high quality of support in both warranty and post-warranty periods. T-2 qualifies Iskratek as a reliable supplier and partner.

Miroslav Štravs
Chief Technology Officer
T-2

“Ukrcom and Iskratek have a long-standing and successful history of cooperation. During all the time, Iskratek has proven to be a reliable partner and the leader in its segment. Looking back at our history of cooperation, we are glad to state that today we would choose the same vendor as many years ago.

Vladyslav Parfiryev
Technical Director
Ukrcom
