

Quality Policy

ISKRATEL
S&T Group

Vision

Comprehensive digital solutions for a safe and smart future.

Mission

We create new value, provide safety and improve the overall quality of life. We create reliable and comprehensive solutions for telecom operators and service providers, for the digitalisation of transport, public safety, and energy industries, and in the field of electronic manufacturing services. We ensure the sustainable and long-term success of our customers and partners, while also taking into account the local characteristics and quickly adapting to them.

Quality Policy

- We implement the principles of business excellence through continuous improvement of our processes. In doing so, we include our customers and suppliers and provide opportunities for our employees to express their creativity and talents.
- The skills and qualifications of each employee are essential for achieving and maintaining the required quality. We therefore ensure the personal development of all our employees through constant education.
- We have integrated into our quality system the knowledge, experience, and best practices gained over our 70-year history in developing, producing, and maintaining telecommunications systems.
- Curiosity, energy and trust: the corporate values that connect us.
